DATAMITES® ACCOLADES

12+ Years of Excellence ★ 200K+ Learners ★ 20+ Accreditations

Best EdTech Institute India 2026

#TopEducationBrands
BW EDUCATION
TOP EDUCATION BRANDS AWARDS
Recognising BW Education Power Players of 2026

RANKED IN TOP #20 AMONG IITS AND IIMS

1ST RANKED INSTITUTE

TECHGIG
India's largest tech community

Based on the research study by TECHGIG, DataMites is ranked as the top institute for Data Science

RANKED #1

Data Science Institute by IABAC

AWARDED TOP 10

Best Institute by Silicon INDIA

NASSCOM PARTNER

NASSCOM®
MINISTRY OF ELECTRONICS & INFORMATION TECHNOLOGY GOVERNMENT OF INDIA

Aligning curriculum with industry requirements. Assess and certify learners by Govt of INDIA

CII PARTNER

Confederation of Indian Industry

DataMites® chosen as a partner by CII for providing AI training C-level executives MNCs in India

DPIIT #startupindia

DataMites officially recognized by the Government of India (DPIIT) under Startup India in the Education and E-Learning sector

WHY DATAMITES?

TOP 4 REASONS

1. **Curriculum aligned with Industry**
Syllabus aligned with industry as per global accreditation bodies

2. **Ashok Veda as Lead Mentor**
Highly respected AI Expert and Coach as lead mentor ensuring quality mentorship
linkedin.com/in/ashokveda/

3. **Realtime Internship**
Every learner gets Internship in the selected industry with AI roles for real-time experience, which is valuable in their career progress

4. **End to End Career Assist**
A dedicated career assistance team helped thousands of learners in transitioning into their dream job.
Check out Success Stories YouTube

KEY HIGHLIGHTS

1. Flexible Learning
Learners can repeat sessions, change batches , change learning modes, ad-hoc doubts sessions anytime.

2. Career-Oriented curriculum
The course curriculum is aligned with Industry requirement by expert content team, ensuring career-oriented curriculum

3. Elite instructors
Elite mentors and faculties members holding real-time experience from leading companies. and rom league institutes such as IIMs

4. Bonus Value-Added Courses
Get access to high-value, career-focused bonus courses delivered through live instructor-led sessions

5. Lifetime Access
Learners have lifetime access to core materials supporting continuous learner beyond the course, ensuring continual learning

6. Case Study Based Approach
Learn through industry-relevant case studies across multiple domains, completed during the project phase.

PROGRAM STRUCTURE

STRUCTURED 3 PHASE LEARNING APPROACH

The course is designed for working professionals to build practical AI skills through domain specialization, focused on the AI needs of their industry and job roles. It also includes AI for Managers to support better decision-making and the use of AI at work.

- ✔ **5** Weeks program
- ✔ **20** Hours learning a week
- ✔ **80+** Learning hours
- ✔ **Case Study Base Approach**
- ✔ Global **Certifications**
- ✔ **Career Assist** Program

PHASE -1
LIVE TRAINING

- 3-Weeks Duration
- Live Training
- 20 hour a week
- Comprehensive Syllabus
- Expert trainers and Mentors

PHASE -2
CASE STUDIES

- 2-Weeks Duration
- Case Study Based Approach
- Domain Specialized Use Case
- AI-Driven Leadership Skills

PHASE -3
CERTIFICATIONS

- IABAC Cert
- DATAMITES Course Completion

OUR TOP HIRING PARTNERS

DATAMITES HAS A STRONG NETWORK OF 1000+ HIRING PARTNERS

PROGRAM CURRICULUM

AI FOR PROFESSIONALS - COURSE BUNDLE

- DataMites® AI for Professionals Course Bundle is a comprehensive AI program designed to help professionals apply AI effectively in their roles and industries. The program combines domain specialization with an AI for Managers course, enabling professionals to build practical AI skills, make smarter decisions, and drive AI-led innovation.
- The course is regularly updated to align with evolving industry needs and follows a structured learning approach for focused, practical, and effective learning.

BUNDLE CODE	**CDM-AWP-BUN-088**	LEARNING HOURS	**100**
ADD-ON	Case Studies	TOTAL DURATION	5 Weeks

ORDER	COURSE	CODE	LEARNING HRS
1	AI in Practice for Professionals	CDM-AWP-316	80
2	AI for Managers	CDM-AIM-126	20

Important Note: The curriculum is subjected to change as required by the global accreditation bodies to align with industry requirements. Please check with your counsellor or drop email to care@datamites.com for updated curriculum

AI IN PRACTICE FOR PROFESSIONALS

COURSE CODE	**CDM-AWP-088**	LECTURE HOURS	**32 hrs.**
PREREQUISITES	None	LEARNING HOURS	80 hrs.

MODULE 1

UNDERSTANDING AI (FROM HISTORY TO MODERN AI)

Evolution of AI

- What is Intelligence?
- Artificial Intelligence,History of AI
- AI Summers & AI Winters
- Expert Systems
- Machine Learning Revolution, Deep Learning Revolution
- Generative AI Revolution
- Agentic AI Revolution

How Machines Learn

- Rule-based Systems
- Machine Learning,Supervised Learning, Unsupervised Learning,Reinforcement Learning

Deep Learning Intuition

- Neural Networks, ANN
- CNN, RNN, LSTM
- Attention, Transformer

Modern AI

- Foundation Models, LLM, Embeddings
- Vector Database, RAG
- AI Agents, MCP (basic introduction)

MODULE 2

DESIGNING AI ASSISTANTS & AGENTS

Introduction to AI Workflows & Agents

- What is an AI Workflow?
- Workflow vs Automation vs AI Agent
- Components of an AI Agent, Triggers, Nodes & Actions
- Introduction to n8n Interface, Setting up n8n (Cloud / Desktop)
- Connecting OpenAI API, Running the First AI Workflow

Prompt Engineering inside n8n

- User vs System Messages
- Structured Output (JSON)
- Temperature, Model Selection, Prompt Testing & Debugging

Building AI Workflows

- Trigger Nodes, Webhook Basics, Forms & Input Collection, IF / Switch / Conditional Logic, Variables
- Data Transformation, Passing Data Between Nodes

Building an AI Assistant

- Designing a Business Assistant, Knowledge-based Responses, Uploading Documents
- AI Memory (Concept), Conversation Flow, Testing & Debugging

AI IN PRACTICE FOR PROFESSIONALS

COURSE CODE	**CDM-AWP-088**	LECTURE HOURS	**32 hrs.**
PREREQUISITES	None	LEARNING HOURS	80 hrs.

MODULE 3

AI PRODUCTIVITY TOOLS AND RESPONSIBLE AI

AI Productivity Tools

- ChatGPT, NotebookLM,Claude, Perplexity, Canva AI

AI Workflow Design

- Task Audit,Workflow Mapping,AI Automation
- Time Saved & Quality Check
- Human-in-the-loop

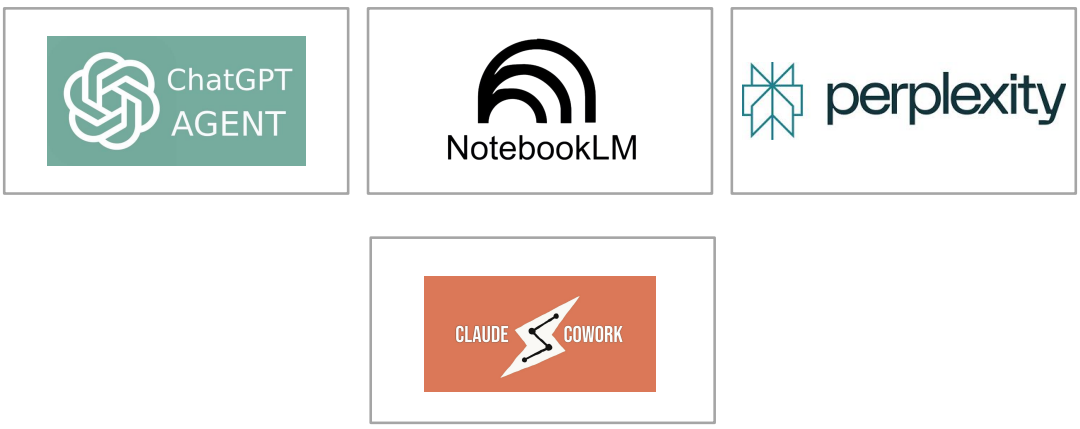

Responsible AI

- Bias, Hallucination, Privacy, Copyright

AI Capstone

- Personal AI Productivity Plan,Prompt Library
- AI Productivity Portfolio,AI Tool Selection,Final Presentation

TOOLS/PLATFORMS COVERED

AI IN PRACTICE FOR PROFESSIONALS

COURSE CODE	**CDM-AWP-088**	LECTURE HOURS	**32 hrs.**
PREREQUISITES	None	LEARNING HOURS	80 hrs.

MODULE 1

AI FUNDAMENTALS IN FINANCE

- **Topics :**AI in finance, predictive analytics, forecasting concepts, AI lifecycle
  Use Case : AI-assisted Budget Planning

MODULE 2

FORECASTING & FINANCIAL ANALYTICS

- **Topics :** Revenue forecasting, expense forecasting, scenario analysis, sensitivity analysis
  Use Case : Revenue Forecasting for Annual Budget Planning

MODULE 3

AI-POWERED BUDGET OPTIMIZATION

- **Topics :** Cost optimization, financial dashboards, interpreting AI forecasts
  Use Case : Cost Forecasting & Expense Optimization

MODULE 4

RISK ANALYTICS & EXPLAINABLE AI

- **Topics :** Credit risk scoring, explainable AI, model validation
  Use Case : AI-based Credit Risk Assessment

MODULE 4

FRAUD DETECTION USING AI

- **Topics :** Fraud detection models, anomaly detection, transaction monitoring, compliance
  Use Case : AI-powered Fraud Detection & Transaction Monitoring

AI FOR MANAGERS

COURSE CODE	**CDM-AIM-126**	LECTURE HOURS	**8 hrs.**
PREREQUISITES	None	LEARNING HOURS	20 hrs.

MODULE 1

IDENTIFYING & PRIORITISING AI USE CASES

- Identify business problems suitable for AI
- Map current process and pain points
- Define expected business outcomes
- Assess feasibility, data availability, impact and risk
- Prioritise use cases based on value vs complexity
- Define clear ownership and stakeholders

MODULE 2

REQUIREMENTS & SOLUTION PLANNING

- Convert business needs into clear AI requirements
- Define inputs, outputs, users and workflow
- Identify data sources and data-quality requirements
- Define human intervention and approval points
- Set functional and non-functional requirements
- Work effectively with AI teams, IT teams and vendors
- Define measurable project success criteria

AI FOR MANAGERS

COURSE CODE	**CDM-AIM-126**	LECTURE HOURS	**8 hrs.**
PREREQUISITES	None	LEARNING HOURS	20 hrs.

MODULE 3

PILOT EXECUTION & OUTCOME VALIDATION

- Define PoC and pilot scope
- Establish baseline performance
- Select pilot users, data and test scenarios
- Define KPIs and acceptance criteria
- Validate accuracy, reliability and consistency
- Test edge cases, errors and AI failures
- Measure business impact: time, cost, productivity, revenue and quality
- Collect user feedback and adoption metrics
- Make Go / Improve / Stop decisions

MODULE 4

PRODUCTION, GOVERNANCE & SCALING

- Assess production readiness
- Plan integration with existing systems and workflows
- Define human-in-the-loop and escalation mechanisms
- Address privacy, security, bias, compliance and accountability
- Define monitoring and performance dashboards
- Establish AI ownership and support processes
- Manage user adoption and change management
- Scale successful pilots across teams and functions
